📁 Experience

Vigorous IT Solution, MERN Stack Developer

11/2023 – present | Jaipur, India

Responsibilities: Developed backend features using various tools like **Nodejs** and **MongoDB**. Implemented logic-based functionalities in **Reactjs**, **Readux**, Collaborated with the team for seamless integration. Achievements: Noted for problem-solving and being proactive. Improved the performance of existing systems. Quickly learned new tools. **Worked on 7 to 8 different projects** related to **GAME's** Development. **Fantasy Games** inside **Admin/Client** Panel in **MERN** Stack , Ecom Shopping Webapp .

The Indian IT Technology, MERN Developer : Trainee/Employee

09/2022 – 10/2023 | Jaipur, India

I have worked and Trainee / Employee on multiple projects using the **MERN stack**, creating features with **React**, **Redux**, and **Nodejs**, and managing databases with **MongoDB**. I deployed projects on **AWS** and **Vercel**. I built dynamic and live APIs, handled backend tasks, and completed 4 to 5 projects, including education client and admin projects. I also collaborated with teams using **Git** for version control.

📁 Projects

Lead Management Project (Present), Mern Stack Project

Developed a **MERN Stack Lead Management System** with Node.js, Express, React, and MongoDB. Created an admin panel for managing users, roles, and projects. Added features for account and bank statements. Deployed on Vercel and managed with Git.

ShoppingApp (Clothing Shopping Web App) Link: <https://shoppingapp-three.vercel.app> 🔗

Developed a full-featured **MERN Stack Web Application** for a clothing store, integrating Razorpay for seamless payment processing. The app includes user authentication, product browsing, cart management, and a secure checkout process.

ExpenseTrackerApp Link: <https://expense-tracker-app-frontend-six.vercel.app> 🔗

Built a **MERN stack** web app using HTML, CSS, Tailwind, JavaScript, React, Redux, Node.js, Express, and MongoDB. Features include password reset, secure logins with JWT, lending/borrowing money, and repayment reminders. Hosted on Vercel.

Dynamic ThemeProvider API

Built a dynamic theme management API using the **MERN stack** (Node.js, Express, React, MongoDB Atlas). Enabled user management and dynamic theme customization for React and Tailwind CSS projects. Supported creating, reading, updating, and deleting user and theme data.

Product Seller App

Developed a single-page web app using EJS Template, HTML, CSS, and JavaScript. Backend built with Node.js, Express, Sequelize ORM, and MySQL. Hosted on AWS with Git, Nginx, and Jenkins for automatic updates.

Product In Stock App

Created a single-page web app with EJS Template front-end and Node.js back-end using Sequelize ORM and MySQL. Hosted on AWS with Nginx and Jenkins for CI/CD, and managed code with Git.
